PROFILE

I'm a hardworking and fast-learning **student**, currently seeking for an **internship** after my **1,5-year** studying of **full-stack programming in Tredu**.

During my studies, I found myself enjoying a **front-end** development because I understood that the process of designing and building a modern and pleasurable system is a new way of expressing our feelings and thoughts, it's a new way of art.

After these 1,5 years, I have an experience in:

- **several programming languages** (basically it was **JavaScript**, **PHP**, **HTML** and **CSS**),

- some amount of **libraries and frameworks** (**React JS**, **Bootstrap**, **Node JS**),

- **2 team projects** (agile, scrum, GitHub, team-work),
